MEET THE DPA

The DPA is a nonprofit organization comprised of pathologists, scientists, technologists and industry representatives dedicated to advancing the field of digital pathology. The organization’s mission is to facilitate education and awareness of digital pathology applications in healthcare and life sciences. Members are encouraged to share best practices and promote the use of technology among colleagues in order to demonstrate efficiencies, share knowledge and its ultimate benefits to patient care.

WHAT WE'RE DOING

Digital pathology is now being recognized as a proven and essential technology, providing additional tools that can provide faster, higher quality and more accurate diagnoses that are crucial to achieve the class of results demanded by patients and physicians. The DPA’s committees and taskforces are dedicated to:

- Enhancing the field of digital pathology
- Exploring digital pathology applications, education and best practices
- Collaborating with the FDA on equipment approvals, and
- Addressing technology regulations
A GROWING COMMUNITY

Through our globally connected community of thought leaders and members, we are committed to:

- Adding to the accessible knowledge base of digital pathology
- Promoting new, influential technologies for pathology practitioners worldwide
- Working with those who possess the desire to further their personal understanding and their desire to bring more awareness to the field
- Providing exclusive webinars and Pathology Visions presentations that showcase technologies, new case studies and theories emerging within the field

PATHOLOGY VISIONS

Pathology Visions, the Digital Pathology Association’s annual conference, delivers education and best practice purveyance, while influencing industry standards and contributing to the advancement in the standards of patient care.

Attendees at Pathology Visions will have access to:

- Over 30 expert presenters
- A wealth of knowledge from thought leaders and pioneers in digital pathology
- Cutting-edge workshops with distinguished trade visionaries
- The latest product solutions
- Presentations covering multiple tracks comprised of clinical, image analysis, education and research topics

Don’t miss your opportunity to hear from some of the greatest minds in digital pathology.

JOIN. SUPPORT. VOLUNTEER.

Members have the opportunity to be a part of a committee that aids in the advancement of digital pathology, working collaboratively to affect change within the industry. A global network of professionals across disciplines such as pathology, information technology and medical engineering are united behind this purpose. This network supports relationships to be created and partnerships to be formed.
