

**DIGITAL  
PATHOLOGY**

**DPA**

**A S S O C I A T I O N**

[digitalpathologyassociation.org](https://digitalpathologyassociation.org)

## EDUCATION

We believe tailoring remote learning, training and certification for patients/patient advocacy groups, residents, and lab technicians will achieve the normalization of Digital Pathology.

## COLLABORATION

We believe greater coalition building with associations and pharma will achieve more digital health funding allocation.

## MEMBERSHIP

We believe tailoring our content and messaging to increase the quality of engagement for our increasingly diverse membership will drive adoption and normalization.

## REGULATORY

We believe that greater alignment, clarity and engagement with DP technology for global regulatory agencies will achieve innovation in the marketplace of evidence-based standards.

## REIMBURSEMENT

We believe a framework for reimbursement, clinical evidence, and more collaboration with payers and patients will increase coverage and drive digital pathology and cytology being standard of care.

## STANDARDIZATION

We believe a holistic standards framework and expanding DPA's connectathons focused on industry and providers, will drive true interoperability, reduce risk and inequity to improve health outcomes.

Global community of **4,500+** digital pathology professionals – united by a shared commitment to advancing patient-centered pathology.

**Mission:** Facilitate awareness, education and adoption of digital pathology and AI applications in healthcare and life sciences.

Fostering an exchange of ideas to help members understand, navigate, and influence the future of pathology and enhance **patient care globally**.
